📠 +43/ 3322/ 444 40 100

✉ office@bluechip-energy.at

🌐 <http://www.bluechip-energy.at>

Wanted: Direct Customers

Company Overview

Blue Chip Energy GmbH, based in Güssing in the Burgenland region of Austria, was founded in Spring 2006

In 2009 the company launched the manufacture of monocrystalline high-performance solar cells, employing a highly qualified workforce of 90 people.

Our aim is to make renewable energy feasible as a basic source of supply and an integral part of a liberalized electricity market for a majority of households. This not only requires technical know-how and commercial skill, but also a fundamental commitment to making visions come true.

Photovoltaic energy plants have in recent years developed into a globally acknowledged alternative to conventional energy production concepts, and are taking on a steadily growing proportion of our overall power generation needs.

Our contribution to an ecologically sustainable relationship with nature is to drive forward this technology so that it becomes feasible for each and every one of us to generate energy from sunlight.

+43/ 5/ 17 07-55284
kontakt@elin.com
http://www.elin.com

Wanted: Direct Customers

Company Overview

Under the new name ELIN GmbH & Co KG, we have been continuing the activities of Siemens Elin Buildings and Infrastructure GmbH in the building project and municipal infrastructure business since October 2008. Our company is a joint venture of Ortner Group and Siemens AG Österreich, with each of the partners holding 50% of the shares. Our business partners can rely on our professionalism, our excellent quality, and the long-standing experience of our experts.

We are a leading company in the field of Electrical engineering, Process control and building automation systems, Communication, safety and security systems, Power networks and special networks.

With partner companies: Heating, ventilation, air-conditioning and sanitary systems

Technical building equipment competence plus lifecycle business models and servicing offers complement our portfolio. Our area of activity is not limited to our home market, Austria, but also covers Central and Eastern Europe as well as Russia. Our 100% subsidiary EBG Haustechnik GmbH & Co KG, formerly Siemens Elin Haustechnik GmbH & Co, continues to focus - professionally and reliably - on providing HVAC and electrical solutions in Upper Austria.

Company Overview

GMUNDNER FERTIGTEILE Ges.m.b.H. & Co KG was founded in 1972 and is the patent holder and producer of the BODAN level crossing system. It is used as the standard level crossing system by many state-owned and private railway companies worldwide.

BODAN is a modular level crossing system. It is suitable for all types of rails, sleepers and fastenings. The application of patented GEFCON polymer concrete guarantees an extremely high load-bearing capacity under heavy traffic loads as well as a long life-cycle. An advantage is the easy exchange of individual panels as well as low maintenance costs.

 ✉ info@palfinger.com
 🌐 <http://www.palfinger.com>

Wanted: Direct Customers

Company Overview

the company has for many years been among the leading international manufacturers of hydraulic lifting, loading and handling systems. As a multinational company group with its headquarters in Salzburg, Austria, PALFINGER has production and assembly sites in Europe, in North and South America as well as in Asia. Innovation, further

internationalisation and diversification of products and services form the strategic pillars of the corporate strategy. In line with this, PALFINGER today stands for innovative lifting, loading and handling solutions at the interfaces of the transport chain.

The core product is the truck mounted knuckle-boom crane. The company is the world market leader in this segment with close to 150 models and a market share of 30 percent. In hookloaders and timber cranes too (PALIFT and GUIMA) PALFINGER is the world's biggest manufacturer. Over the years the product portfolio has been steadily expanded with products such as the CRAYLER mounted forklift, the RATCLIFF and MBB tail-lifts, and the BISON and WUMAG truck mounted aerial work platform. In addition, the company develops innovative solutions for railway applications, bridge inspection and recycling. Cranes for use in agriculture, forestry and other off-road applications complete the product range.

+43/ 662/ 65 82-7010
info@redbull.at
<http://www.redbull.at>

Wanted: Direct Customers

Company Overview

In 1984, Dietrich Mateschitz founded Red Bull GmbH. He fine-tuned the product, developed a unique marketing concept and started selling the RB Energy Drink on the Austrian market in 1987. Red Bull got off the ground in no time flat, giving people wings right from the start. In 1992, Red Bull touched down in its first foreign market, in Hungary. Today, Red Bull is energizing over 130 countries around the globe.

Red Bull is much more than a soft drink – it is an energy drink. It was made for moments of increased physical and mental stress and improves endurance, alertness, concentration and reaction speed. In short: it vitalizes body and mind. The effectiveness of Red Bull Energy Drink has been proven by a large number of scientific studies.

3 billion cans of Red Bull Energy Drink were consumed worldwide in 2006.
