

Directory of Testing Laboratories in India

Brief Description:

The Indian MSMEs are facing problems in identifying the laboratory needed for a specific test because these laboratories are not listed at one place. To address this complex issue FISME brought out a directory by mapping all testing laboratories in India of relevance to Industry and Service sector across India. The directory which houses close to 3000 laboratories further categorized into testing, calibration and services. A detailed mapping has been done for each laboratory covering the details of types of tests offered, product specialization and accreditations. The directory has a simple and effective indexing system for retrieval of information.
