Compendium of MSME Support Schemes (Envisaging Role for Associations/ BMOs)

The Compendium is prepared and published by Federation of Indian Micro and Small & Medium Enterprises (FISME) to spread awareness of relevant MSME support schemes of Central Government among Industry Associations and Business Membership Organizations (BMOs). The compendium maps all major schemes envisaging role for associations and currently in operation. It provides information on their focus and components and extent of funding.

The compendium is a part of the larger report "Analysis of MSME Support Schemes Involving Industry Associations and Suggestions for Effective Implementation" which was produced under the programme 'CAPABLE'. The programme aims to build capacities of MSME associations in India. It is being implemented by FISME and supported by German Technical Cooperation (GTZ).

Foreword

All over the world, industry associations serve as a critical link between governments and small and medium enterprises (SME), especially when it comes to negotiate policies and support programmes geared towards enabling increased competitiveness and overall growth. They are key players in the necessary public-private dialogue.

During the last two decades, business environment in India has improved noticeably. But for SMEs, major challenges remain. This sector, which is the second largest employer after agriculture, and which policy makers consider being a critical vehicle for achieving the inclusive growth, can still be considered hugely underserved with regard to financial and non-financial services. It is also struggling to access public support schemes that help them to overcome their key bottlenecks of development.

These gaps persist in spite of an impressive list of public support programmes, set into motion by various ministries, often without effective coordination. A study conducted by FISME with support of SME Finance and Development Project implemented by SIDBI and GTZ, highlights obstacles both on the supply side, i.e. policymakers and public support schemes, as well as on the demand side, especially regarding the capacity of BMOs to serve as an effective, reliable, representative and democratically mandated interlocutor in public-private dialogues, and with regard to their capacity to take on imple-menting functions within public-private partnerships. All too often, BMOs of SME suffer from ambiguity of purpose and a low resource base. Being trapped in the vicious circle of 'low resource - few activities - low membership - low resources', this weakness restricts their ability to work as facilitators of change processes, and as intermediaries to the resources and services provided by public schemes.

Against the background of this analysis, bilateral Indo-German Cooperation has identified the capacity building of BMOs as a key area of intervention. Together with our partners, we strive to institutionalize capacity building that enables BMOs to be an effective partner in public-private dialogues as well as public support programmes and PPP, and also to become successful service providers to their member enterprises. This approach complements other elements of our private sector promotion approach, i.e. policy analysis, improvement of financial and non-financial service delivery systems, and of support schemes. A first step in this effort, and together with the Federation of Indian Small and Medium Enterprise (FISME), we have analyzed objectives and impacts of various government PPP schemes suitable for SME associations or groups of SMEs, leading to a set of recommendations for their improvement. On behalf of GTZ, we sincerely thank our partner FISME and all other partners who took keen interest in the study and provided their full support to the team. We hope that the present publication "Compilation of public schemes" will be useful for all.

Compendium of MSME Support Schemes

(Envisaging Role for Associations/ BMOs)

There has been a widespread recognition in India that vibrant small enterprises are potentially a key engine of economic growth, job creation and greater prosperity. The Government of India's successive industrial policy statements have emphasised the role that small enterprises can play in providing employment to millions of workers transitioning out of agriculture each year. The development of small scale sector has been seen as a method of ensuring a more equitable distribution of national income and facilitating the effective mobilisation of capital resources and skills which might otherwise remain un-utilised.

The promotional set up for the MSME sector, therefore, has been elaborate. The emphasis of the most MSME development schemes has been on the unit level support delivered through public institutions till 1980s. However, the Industrial Policy of 1991 and Abid Hussain Committee Report (1997) induced a paradigm shift to the vision of promotional policy for the sector. The points of departure could be classified in three broad directions. Firstly, the focus of the policy support shifted from protection to promotion. Secondly, besides individual enterprises the target beneficiary group expanded to include groups of enterprises based in clusters. Thirdly, there has been a marked gradual shift from sole reliance on public institutions in formulation and execution of the support schemes to also include associations, other civil society institutions as well as private sector.

In the context, a need was felt to identify those schemes which envisage a role for Industry Associations and BMOs in implementation. As part of the larger report "Analysis of MSME Support Schemes Involving Industry Associations and Suggestions for Effective Implementation" which was produced under the programme 'CAPABLE', all the schemes under Central Ministries/ Departments were mapped. A set of 45 relevant schemes has been identified.

While the broader aim of all schemes is competitiveness and growth of the MSME sector, different schemes try to achieve this aim by focusing on one of the following five areas:

- Provision of infrastructure
- Soft interventions including capacity building, training etc
- Marketing assistance/ market access
- Technology up-gradation
- Research & Development/ Innovation

The schemes envisage either one or a combination of the following roles for Associations/ BMOs in its implementation:

In need assessment and scheme design:

Some of the schemes in their design stage envisage involvement of BMOs so that the provisions are demand driven and in line with the needs of the sector.

Awareness creation/ information dissemination:

BMOs generally encouraged are involved to disseminate information about the schemes and support programmes amongst their members. In some of the schemes the BMOs are provided financial assistance for awareness creation through workshops/ symposiums/ seminars etc.

Promoters of vehicles for implementation:

Many of the schemes, especially the ones designed on Public Private Partnership (PPP) framework, envisage creation of Special Purpose Vehicles (SPVs) to act as implementing agencies encourage associations to lead the projects in initial stages, submit preliminary proposals, mobilize entrepreneurs to come forward and promote SPVs etc

As part of evaluation/ approval committee:

The Project screening/ approval committees under most of the schemes have representation from industry associations. BMOs are also part of technical committees evaluating proposals.

As an implementing agency:

There are schemes which recognize BMOs as the eligible agencies for direct implementation of projects. Most of these schemes provide assistance for soft interventions, research and infrastructure projects.

As monitoring and evaluation agency:

There are schemes which recognize the close linkage between BMOs and members who are beneficiaries under various schemes. Hence BMOs are made part of the monitoring and evaluation framework.

The compendium devotes one page each to the schemes outlining their focus, various components of the scheme and extent of funding.

Project Partners

GTZ

India has been a partner country of German Development Cooperation for nearly 50 years. For almost all of this time, GTZ - Deutsche Gesellschaft fuer Technische Zusammenarbeit (GTZ) GmbH - has been active in India on behalf of the German Federal Ministry for Economic Cooperation and Development (BMZ).

Established in 1975, GTZ is organised as a private company owned by the German Federal Government. The BMZ is its major client. It provides viable, forward-looking solutions for political, economic, ecological and social development in a globalised world. To address India's development priorities of sustainable and inclusive growth, GTZ's joint efforts with the partners in India currently focus on three priority sectors: Energy, Sustainable Economic Development and Environmental policy, conservation and sustainable use of natural resources.

Project Capable

FEDERATION OF INDIAN MICRO AND SMALL & MEDIUM ENTERPRISES (FISME)

FISME came into being in 1995 as a Federation of geographical and sectoral associations of Micro, Small and Medium Enterprises (MSMEs) spread across districts and states in India. Born during period of liberalization and at the time of India's accession to WTO, its mindset, mission and activities have been shaped by these national and global developments. It is a multi-sector, politically neutral and not-for-profit organization. It aims to facilitate development of an entrepreneurial and competitive environment at home and greater market access for Indian MSMEs in India and abroad. Working with a strong orientation for reforms in regulatory environment and public promotional policies to enhance competitiveness of MSMEs vis-a-vis their larger domestic counterparts and foreign firms, FISME organizes a wide range of MSME support programmes and undertakes implementation of development projects. It is widely regarded as the progressive face of Indian MSMEs.
